Parana, Dhana Mae L.

WEEK-1 FEBRUARY 7,9,10

February 7 2023

- Sir mark orient us about rules and policies inside the I.T. department

- Briefing about the management's position inside the web development team, from the I.T. head to the manager and developers from core and non-core development
- Some talk about the origin, history, and owner of the company and how it works.
- Vision and mission

- Got to observe what developers do on their daily work, a buddy-to-buddy way to teach and orient how their work flow.

February 9,2023

- Downloading application/IDE such as Xampp, Vscode, Bash, Git, and php/mysql through ubuntu on our computer device since it is a Linux.
- Answering few calls
- Sir Russ orients us how the ticketing system works and how to make a ticket, also what the role of ERS in the company and how essential it is.

February 10, 2023

- Started coding, created a simple login form which is a mirror to the login form of the test environment of Motortrade website, created a replica of it then changes the default design of it.
- After the login form, we made a database of it that enable to connect the index.php to the login.php by using the POST method, Sir Russ taught us that. then containing the information into the table of our login.php after the user sign-up/login.
